### Input

programming

### Output

ProgramminG

```
import java.util.Scanner;

public class Program {

    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        String str=sc.nextLine();
        int n=str.length();
        for(int i=0;i<n;i++) {
            if(i==0) {
                System.out.print(Character.toUpperCase(str.charAt(i)));
            }
            else if(i==n-1) {
                System.out.print(Character.toUpperCase(str.charAt(i)));
            }
            else {
                System.out.print(Character.toLowerCase(str.charAt(i)));
            }
        }
    }
}
```
