Day 29 coding Statement : Write a Program to concatenate a string.

Description

Get two strings as input from the user and then concatenate it.

Input

Enter first string

Hello

Enter second string

Hi

Output

HelloHi

```java
import java.util.Scanner;

public class Program {
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        String str1=sc.next();
        String str2=sc.next();
        System.out.println(str1.concat(str2));
    }
}
```
